

# PRADEEP KUMAR KANDALA

## SENIOR BACKEND / LEAD SOFTWARE ENGINEER

Java | Spring Boot | Microservices | Distributed Systems | API Architecture

Argyle, Texas, USA | +1 614-705-5825 | kpradeepster@gmail.com | [linkedin.com/in/kpradeepster/](https://www.linkedin.com/in/kpradeepster/)

### PROFESSIONAL SUMMARY

Senior backend engineer and technical lead with 17+ years of software engineering experience designing, modernizing and supporting enterprise systems across insurance, financial services, manufacturing and telecommunications. Deep expertise in Java, Spring Boot, microservices, REST APIs and distributed backend systems, with extensive experience transforming large legacy platforms into modern service-based architectures. Combines hands-on engineering with architecture, stakeholder collaboration, production ownership and mentoring. Led a 15-engineer US/India team through a major Allstate modernization delivered 20 days ahead of schedule; earlier Aptiv modernization covered an enterprise estate of approximately 800 Oracle Forms within a program team of approximately 40.

### CORE TECHNICAL SKILLS

**Backend:** Java, J2EE, Spring Boot, Spring MVC, Spring Core, Spring Batch, REST APIs, Microservices, JPA, Hibernate

**Data & Messaging:** Apache Kafka, Oracle, PL/SQL, MongoDB, MySQL, SQL Server

**Security:** Spring Security, OAuth, authentication/authorization, certificate-based authentication, F5/iRules

**Testing & DevOps:** JUnit, Mockito, Jenkins, Gradle, Maven, Git/GitHub, SonarQube, PCF, Datadog, Splunk

**Architecture & Leadership:** System modernization, API design, microservices architecture, technical design, requirements analysis, code review, mentoring, stakeholder collaboration

**Additional:** React, Angular, Python, BPMN 2.0, Unix/Linux

### PROFESSIONAL EXPERIENCE

#### Senior Application Developer | Atos

Jan 2024 - Present

Client: Allstate Insurance | Texas, USA

- Design and develop backend services for Allstate insurance platforms using Java, Spring Boot, REST APIs, MongoDB and Apache Kafka.
- Translate business and system requirements into maintainable technical solutions in collaboration with stakeholders, architects and engineering teams.
- Develop and maintain microservices and APIs supporting enterprise insurance workflows, with automated testing using Java frameworks and Python-based test automation.
- Support CI/CD and deployment processes using Jenkins, Gradle and Git/GitHub, and contribute to architecture reviews, technical design and developer mentoring.

#### Software Development Consultant / Technical Lead | Compunnel Inc.

Sep 2021 - Dec 2023

Client: Allstate Insurance | Implementation Partner: Atos | USA

- Led a distributed team of approximately 15 engineers across the United States and India on modernization of Allstate's roadside-assistance platform.
- Led migration of a legacy Oracle Forms application to a Java/Spring Boot microservices backend and React-based frontend, delivering the ARS modernization 20 days ahead of schedule.
- Designed and implemented microservices and REST APIs for ARS and ASC-POD insurance platforms using Java, Spring Boot and related Spring technologies.
- Worked with client architects and business stakeholders on requirements, technical design and prioritization; mentored developers, performed peer reviews and participated in hiring/team development.
- Applied JUnit and Mockito testing practices and supported CI/CD using Gradle, Jenkins, Git and SonarQube.

#### Technical Lead / Architect / Assistant Consultant | Tata Consultancy Services / CMC Ltd.

Jan 2011 - Sep 2021

Client engagements across India, USA and Europe

#### Aptiv (formerly Delphi) - Technical Lead / Architect | Aug 2016 - Sep 2021

- Led technical modernization of Aptiv's Global Shared Data platform, an enterprise engineering/manufacturing system supporting 7,000+ users.
- Worked on modernization of a legacy estate containing approximately 800 Oracle Forms as part of a program team of approximately 40 engineers.

- Re-architected legacy functionality toward modern web and Spring Boot/microservices architecture while preserving critical business workflows and user functionality.
- Covered requirements analysis, solution design, implementation, estimation, release planning, production support, code review, mentoring and stakeholder coordination.
- Implemented Spring Security/OAuth concepts for microservices modernization and contributed Java integration work associated with SAP/S/4HANA transformation.

#### **Western Union - Senior Developer / Technical Lead / Transition Lead | Aug 2012 - Aug 2016**

- Worked on enterprise money-transfer platforms including WUPOS, WUTA, Agent Payment Systems and prepaid-card money-transfer applications.
- Led transition activities for Western Union Agent Payment Systems, including transition planning, knowledge transfer, stabilization and technical handover from an outgoing vendor.
- Worked on security-critical authentication systems using certificate-based authentication, F5 load balancers and iRules, with responsibility for security/access issues affecting WUPOS entry.
- Participated in requirements analysis, solution design, estimation, Java/Spring development, testing, production support, release planning and technical documentation.

#### **Ericsson - Software Engineer | Jan 2011 - Aug 2012**

- Developed and tested Java components for a telecom-management platform implementing TMF standards.
- Worked with Core Java/multithreading, CORBA, Objectivity and Rational ClearCase across development, debugging, unit testing and feature testing in India and Italy.

#### **Project Assistant | International Institute of Information Technology (IIIT) Hyderabad**

**Jul 2009 - Dec 2010**

*Government of India / MHRD Virtual Labs | Hyderabad, India*

- Developed software for the MHRD Virtual Labs initiative, enabling remote access to engineering laboratory experiments.
- Gathered requirements from engineering/domain experts and developed backend and UI components using Java, Java 2D/3D and web technologies.
- Led and mentored a student/intern team of nine on Civil Engineering Virtual Labs delivery.

#### **Assistant Professor | VCET Engineering College**

**Jun 2007 - Jan 2009**

*Hyderabad, India*

- Taught undergraduate computer-science subjects including UNIX and DBMS and supported first-year IT laboratory instruction.

### **EDUCATION & CERTIFICATIONS**

**B.Tech - Computer Science & Engineering, 2006** | Institute of Advanced Computer and Research, Odisha

**Certifications:** OCJP (Oracle Certified Java Programmer); Master Hibernate and JPA with Spring Boot in 100 Steps; Go Java Full Stack with Spring Boot and Angular; Project Management Fundamentals
